

1) Poor Mrs. Bringhurst is not feeling very well today ☹️. She went to the store to get supplies to make her feel better. She got 2 bags of honey lemon cough drops for \$2.29 each. Also, she bought a large bottle of orange juice that cost \$3.99 and a new movie to keep her entertained for \$20. How much did Mrs. Bringhurst spend to feel better?

2) If she paid in cash with \$40, how much change did she get back?
